
django-freezer Documentation

Release latest

June 14, 2015

1	Installation	3
2	Running unit tests	5

Code can be found here. <https://github.com/inirudebwoy/django-freezer>

Docs. <http://django-freezer.readthedocs.org>

Installation

Install from pip:

```
pip install django-freezer
```

Put package in INSTALLED_APPS.:

```
INSTALLED_APPS += ('django_freezer',)
```

In urls.py add import of AdminSiteExtended from djangofreezer:

```
from django_freezer.admin import AdminSiteExtended
```

Next create new extended site before calling autodiscover():

```
admin.site = AdminSiteExtended()
```

If you are using Django 1.7 and higher than it is necessary to disable autodiscover as per [manual](#)

Running unit tests

Just use tox:: \$ tox
